

Goal	Pacific and Southeast Asian countries deliver better health outcomes for all								
Strategic objective	Australia is a trusted health partner in the Pacific and Southeast Asia, with stronger institutional linkages and high value placed on our public health expertise								
Development objective	Pacific and Southeast Asian countries have more resilient and equitable public health systems with greater capability to respond to health emergencies								

Development outcomes	EOPO1: Australian assistance contributes to improved ability of partner countries to anticipate, prevent, detect and control communicable disease threats and to address equity in the delivery of these functions			EOPO2: Australian assistance contributes to improved capacity of partner countries to prevent and control non-communicable disease in an equitable way			EOPO3: Australian assistance contributes to increased capacity of partner countries to advance equitable and comprehensive SRHR, particularly for women and girls		
	IO 1.1: Strengthened capacity and systems to respond to epidemic and endemic communicable disease threats	IO 1.2: Strengthened pandemic preparedness and outbreak response systems and capacity	IO 1.3: Increased development, trialling, registration of and access to new or modified medical products	IO 2.1: Effective health promotion, policy and regulatory reform focused on NCD risk factors resulting in changes in behaviour	IO 2.2: Strengthened screening, early detection and management of NCDs	IO 2.3: Effective models of care are supported which promote physical and psychosocial wellbeing	IO 3.1: Improved systems and capabilities to deliver comprehensive, rights based SRHR services and quality information and education	IO 3.2: Australia and partners advocate for and support strengthened legislative and policy environments that advance universal, equitable SRHR	IO 3.3: Improved quality, range and availability of SRH commodities, particularly for women and girls
	EOPO4: Australian assistance contributes to partner countries' improved regulatory mechanisms, data systems, and capabilities to deliver equitable public health action								
	IO 4.1: Improved regulatory systems increase the availability of high-quality, safe, effective and essential medicines and products			IO4.2 : Strengthened data systems, with quality data increasingly informing evidence-based decision making to enhance health policy and programming			IO 4.3: Workforce skills enhanced across key areas, addressing partner government priority needs		IO 4.4 High quality advice made available to meet partner needs, including by deployees

Strategic outcome	EOPO5: Australia's regional health assistance is flexible, responsive and meets the needs of partner countries								
	IO 5.1: Partnerships across government agencies and Australian institutions support the provision of Australian health expertise into the region			IO 5.2: Coordinated action and policy dialogue across global, regional and Australian partners and with posts			IO: 5.3 Efficient program delivery		

Cross cutting outcomes	IO CC1: Greater adoption of One Health approaches and integration of climate change considerations		IO CC2: PHR investments effectively progress gender equality, disability equity and social inclusion (GEDSI) outcomes.			IO CC3: PHR programming is enhanced by First Nations Australians perspectives.		IO CC4: Increased community engagement and locally –led development across PHR investments
